

SECURITY ASSURANCE & DATA PROTECTION COMMITMENT LETTER

Date: August 18, 2026

To: Topgrip Instruments Company

From: NOi Software Pvt. Ltd.

Subject: Official Security Assurance and Operational Safety for **TIC Insight Application**.

1. Official Safety Commitment

NOi Software PVT. Ltd. officially confirms that **TIC Insight Application** was engineered entirely in-house under strict internal development and data privacy protocols. The application has been designed, tested, and deployed specifically to ensure full operational safety, data integrity, and strict access controls for all authorized users.

2. Core Security & Privacy Measures

- **In-House Control:** The application source code was built entirely by our internal team with zero external code dependencies, eliminating third-party security vulnerabilities and data leakage risks.
- **Data Encryption:** All sensitive data processed within the application is encrypted both in transit (using standard TLS/SSL protocols) and at rest.
- **Strict Access Management:** User access is protected by role-based authentication to ensure that data is only accessible to authorized personnel.
- **Continuous Monitoring:** Our internal team actively monitors system performance, application logs, and system integrity to prevent unauthorized access and maintain software stability.

3. Organizational Responsibility

NOi Software Pvt. Ltd. assumes full internal responsibility for the maintenance, security management, and ongoing performance of **TIC Insight Application**. Our development and operational teams remain dedicated to promptly addressing any technical inquiries, security reviews, or operational concerns.
